Firstly; the quality of food written in your meal plan is what your body needs at every weight loss stage for your body metabolism, body organs and function and this is not something for lifetime, this is to reach your ideal and healthy weight in a fast and healthy way.

At every stage there will be elimination or addition for specific food items and quality based on your weight loss, body response to the diet, and the differentiation in your body composition of the fat%, Visceral fat, water % and protein %

Make sure that nothing is forbidden or allowed to you lifetime, but there is a specific quality of food that you should or should not eat at every stage of your weight loss journey.

There are no specific quantities to eat, you can eat until you are super full from all the food items written in your meal plan but the very important thing that anything not written you should not eat at all since it will not affect only your weight loss but also your overall health.

At every meal there is more than one choice, these are choices you can eat them all or choose the most preferable one but the better to eat them all for the nutrition value

It is allowed to you to drink coffee, tea and herbs without adding sugar and without milk if the milk is not written in your meal plan.

You should drink every hour one cup of water and it's very important to keep your body hydrated.

There are no specific timings for the meals, but keep from 2-3 hours between every meal and stop eating before sleeping with 3 hours for better digestive processes.
